OLLERENSHAW et ar -- Serial No.: 09/769,769

14. (Amended) A tissue graft produced by a method comprising the steps of:

- i) washing a starting tissue obtained from a human or animal ureter with a bioburden reducing agent so that said starting tissue is disinfected,
- ii) decellularizing the disinfected tissue resulting from step (i) with water or an aqueous hypotonic buffer that lyses cells of said disinfected tissue so that a tissue matrix is formed, and
- iii) contacting said tissue matrix resulting from step
 (ii) with a nuclease so that nucleic acid associated with
 said tissue matrix is degraded, and
- iv) washing said tissue matrix resulting from (iii) so that cellular or extracellular debris is removed and said tissue graft is produced.
